Situation Overview

- **California State of Emergency Proclamation**

On March 4, 2020, Governor Gavin Newsom declared a State of Emergency for California, as a result of the global COVID-19 outbreak that began in December 2019, to make additional resources available, formalize emergency actions already underway across multiple state agencies and departments, and help the State prepare for broader spread of COVID-19.

- **Global Health Advisory**

On August 6, 2020, in close coordination with the U.S. Centers for Disease Control and Prevention (CDC), the Department of State lifted the Global Level 4 Health Advisory. The Global Advisory, initially put in place on March 19, 2020, advised U.S. citizens to avoid all international travel due to the global impact of COVID-19. For more information visit: <https://www.state.gov>.

- **Executive Order N-33-20**

On August 28, 2020, California introduced a blueprint for reducing COVID-19 in the state with revised criteria for loosening and tightening restrictions on activities by counties. Visit [Blueprint for a Safer Economy](#) for more information and to check the status of a county. This blueprint included a health equity metric to be used along with other metrics to determine a county's tier. The purpose of [Equity Metric](#) is to ensure California reopens its economy safely by reducing disease transmission in all communities.

- **FEMA-4482-DR-CA**

On March 22, 2020, President Trump approved Major Declaration FEMA-4482-DR-CA (DR-4482) for the COVID-19 Pandemic.

Situation Cell Incident Report

Late November Public Safety Power Shutoff

November 25, 2020 - 1500 hours

Report No. 01

Incident Summary

A significant dry wind event will bring high risk fire conditions to portions of Southern California. Southern California Edison, and San Diego Gas and Electric have activated PSPS protocols due to elevated fire conditions.

Confidentiality Notice

This document is for the sole use of the intended recipient(s) and may contain confidential and privileged information. Any unauthorized review, use, disclosure, or distribution is prohibited without the express written consent of the Cal OES Executive Office.

Situation Cell Overview

Elevated fire weather conditions are expected through today over the southern California Mountains, Santa Barbara coast and Santa Clarita Valley and portions of San Diego where winds will locally be gusty up to 45 mph and humidity will remain low. Offshore winds will increase statewide Thursday into Friday creating elevated to critical fire weather conditions with a moderate Santa Ana wind event (up to 50 mph) Thursday night into Friday, with the strongest winds expected Friday.

Key Points

- SCE and SDG&E have notified Cal OES that they are activating PSPS Protocols/Potential to De-energize PSPS Stage.
- The strongest winds of the season could cause damage to trees and power lines.
- Critical fire weather conditions could lead to rapid spread of any new fires.

Potential Impacts

- High winds in combination with dry surface fuels bring critical fire weather conditions.

Weather

Northern California Geographical Coordination Center (Northern GACC):

Fuels indices have moderated quite a bit in the past two weeks due to occasional precipitation and long cool, humid nights with strong inversions. However, in many areas indices are still not quite to seasonal normal levels. A few local spots in the central and southern Sacramento Valley and foothills and lower elevations of the Bay Area have only received very light rain and remain drier. These areas would be more vulnerable to fire spread during windy conditions.

Southern California Geographical Coordination Center (Southern GACC):

Widespread strong offshore winds along with very low humidity will bring a "High Risk" for large fire to much of Southern California Thursday through Saturday. Rapid rates of spread and long range spotting will be likely on new ignitions in windy areas. The large fire threat will decrease significantly across Southern California Saturday through Monday as offshore winds become local. The large fire threat may become high across Southern California once again starting Tuesday depending whether another Santa Ana wind event develops.

	Late October Public Safety Power Shutoff		
	Report Date:	11/25/2020	Report Time: 1500

Santa Ana Wildfire Threat Index

A moderate to strong Santa Ana event looks likely Thursday afternoon through Saturday morning. The strongest winds will occur Thursday evening through Friday morning. Across San Diego County, winds will not start until Friday morning.

Zones	Tue/Nov 24	Wed/Nov 25	Thu/Nov 26	Fri/Nov 27	Sat/Nov 28	Sun/Nov 29
Zone 1: LA-Ventura						
Zone 2: Orange-Inland Empire						
Zone 3: San Diego						
Zone 4: Santa Barbara						

NO RATING	Winds are either not expected, will not contribute to significant fire activity.
MARGINAL	Upon ignition, fires may grow rapidly.
MODERATE	Upon ignition, fires will grow rapidly and will be difficult to control.
HIGH	Upon ignition, fires will grow very rapidly, will burn intensely, and will be very difficult to control.
EXTREME	Upon ignition, fires will have extreme growth, will burn very intensely, and will be uncontrollable.

National Weather Service (NWS)

- Offshore winds will increase statewide Thursday through Saturday creating elevated to critical fire weather conditions.
- A moderate Santa Ana wind event (up to 50 mph) is expected Thursday night into Friday, with the strongest winds expected Friday.
- Critical fire weather conditions are expected due to strong winds and low relative humidity Thursday through Saturday across Southern California.
